DETAILED ACTION

Election/Restrictions

1. Claims 5-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/21/07.

Drawings

2. Figures 1-4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The abstract of the disclosure is objected to because the length should be no more than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2851

5. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-4 are vague and indefinite because they recite "correction of said image signal" in the absence of any recitation of any type of parameter that is to be corrected. Thus, the claims attempt to incorporate any and all types of parameters which may be corrected. Since it is not possible to determine what is being corrected and the claims are indefinite.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Watanabe et al. (5,519,518).

Watanabe et al. (5,519,518) discloses a projection arrangement comprising:

light source (102);

spatial light modulator (108);

illumination optics (103);

projection lens (110);

variable aperture shielding means (111) for varying the amount of light passed to the modulators.

As noted in the description of embodiment , image signal correction means may be provided to provided gamma characteristic corrections. (Column 27 Lines 42-55) Appropriate correction settings are determined and preset for various apertures and stored within ROM as correction tables (203) The correction is carried out on a pixel by pixel basis (each representing an "area").
